will result greatly to their advantage. The fall trade will soon open, and the only thing looked as much like a "considerable town" that is needed to induce the people of Southern as we do of a pleasant day. We hereby invite Kentucky to make this their trading point is them to repeat their visit when the weather to invite them here and let them see that it is to their advantage to do so. But this is a of the city than that with which they must matter that must not be deferred ; if we are have been impressed while threading their way to secure the trade of Southern Kentucky, it through the mud and gloom of the streets must be done at once. The people of that section are now afforded an easy mode of access to our city by the railroad, but in a short time that road will take them to other cities almost as quickly, and if Nashville does not secure their trade now, those cities will secure it then. But we need not dwell upon this subject; our citizens all understand it have been called upon at various times reno doubt, and will act in the premises as they cently through the papers to become candithink best calculated to promote their inter- dates for Mayor, but none of them have reests and the interests of the city. Now that there is opened a certain and speedy communication between them and us, we hope for a closer union of interest and feeling between these union loving neighbors. T. Sneed. By the by, what has become of the proposition to have a grand union barbecue upon the Tennessee and Kentucky line? Shall we wait for the completion of the road to Louis ville, or shall we be satisfied with the one now being prepared, to come off near this city? Whenever it shall be held we hope it will be the means of cementing Tennessee and Kentucky, more nearly together, and of increasing our determinations to stand true to atthe ensuing March election.

This new poet is, it would seem, after a girl whose name is "Mary," and discarding the advice of Shakspeare, who tells him to win his sweetheart with gifts, is making a heavy effort to bring her over to a proper degree of tenderness in his behalf with what appears to have struck the editor of the News as poetry. It may be, low Figures for Casa. If you want the worth of though, that he considers poetry as one of his your money in Hardware call soon at gifts. Read a sample or so and tell us candidly what you think of it:

"Far above rubles or diadems, Thy unrivaled virtues strayed, While beauty's fairest emblems, Were eclipsed beneath your sinde Queenly majesty was upon your brow, A sunshme smile upon your face, I could but in adoration bow,

That is n't such a bad stagger, is it now? Oh, no; but here is something still better. Our poet wants to know if "Miss Mary" will go with him to "a happy clime where the birds doth sing," &c. Hear him:

"To invite thee Mary to a happy clime, Where the birds doth sing and the flowers grow, For us to live " as the onive and the vine. there we will build our joys,

And discard all crief and we And as we gather flowers and play with "toys,"

If "Miss Mary" accepts the invitation, we trust they will come to Davidson. Here "the birds doth sing and the flowers grow," and we may safely say that the locality affords the enterprising young couple as many facilities for living "like the olive and the will receive the thanks of the owner if left at this vine" as any other section of country in the office South. But we beg leave to suggest to them that if they desire to make their fortune rapidly, the less the number of "toys" they attempt to play with the better. It requires teething, by softening the sums re ucing all inflamaa good deal of money to clothe, feed and educate them, and they should not be indulged in to any considerable extent by young perfectly safe in all cases. See advertisement in

We hope our poet will let us know from getting on with "Mary."

There is a vague rumor in circulation to the effect that the Hon. Rufus Choate recently died in Halifax. The general suppo-sition is that it is unfounded.—Boson (La.,)

The general supposition is mistaken. If you should hear it rumored any time soon

you may rely upon it as being true. The most satisfactory way of expressing a young lady's age is according to the

dy has been purchased by citizens of the United tes during the short time it has been before the

mblic. The reason for this extraordinary specess is simply in the actual truth and value of the article. No one buys the MAGNSTIC PLASTER without be-

coming its friend. It performs all that is promised, and carries with it its own recommendation. Truly this is a victory—peaceful and bloodies—but we believe not less glorious than the trium his of war, with its train of carriage and desolation.

The MAGNETIC PLASTER is undoubtedly the

Spatest Strengthener and Pain Destroyer that Sci-one has yet discovered. If you put this Plaster any water, if Pain is there, the Plaster will stick there intil the Pain has vamshed. The Plaster magnetizes he Pain away, and

Puin cannot exist where this Plaster is applied

Put up to air-tight tin boxes. Each box will make ix to eight plasters, and any child can spread there rice 25 cents a box, with full and plain directions.

pests of the vermin kind. The importance of a reliable article of this kind is nestimable. In warm weather all nature teems with these annoying foes. This powder is the only article ever discovered which will exterminate them. A company of botanists, from the Horticultural Society of Paris, while amidst the ferns of Asia, observed that all insects lighting upon a certain kind of plant very soon dropped dead This fact was made use of to guard their night camps from these intruders. Quantities of the plant were brought home by Mr. E. Lyon, and found a positive insect destroyer in every xperiment. It is simply a powdered leaf, chemically prepared to resist the effect of age and climate. Medals and Letters Patent have been obtained from the governments of England, France, Germany and Russia, from the World's Fair, and numerous medial and horticultural colleges and societies.
